🌐 Portfolio

Profile

Energy Science and Technology graduate from ETH Zürich specializing in energy systems modeling and optimization. Experience in techno-economic analysis, heat pumps, thermal energy storage, and CO₂ transport modeling.

Education

ETH Zürich, Zurich, Switzerland 2024 – 2026
MSc Energy Science and Technology

University of Cyprus, Nicosia, Cyprus 2020 – 2024
BSc Mechanical Engineering

Experience

EKO Energy, Nicosia, Cyprus Oct 2026 – Present
Energy Commercial Operations Officer — Manage customer energy contracts and relationships, coordinate supplier processes, and support electricity market operations and regulatory compliance.

EnergyIntel Services Ltd, Nicosia, Cyprus Jun 2025 – Aug 2025
R&D Intern — Modeled thermal energy storage systems and evaluated fluid selection using multi-criteria analysis.

University of Cyprus, Nicosia, Cyprus Nov 2022 – Nov 2023
Department & School Representative — Represented students in faculty meetings, contributing to academic policy discussions and coordinating communication between students and administration.

Texas A&M University, College Station, TX, USA Jun 2023 – Jul 2023
Research Assistant (HVAC) — Performed hardware-in-the-loop and simulation-based analysis of HVAC systems under varying climate conditions.

Projects

CO₂ Transport Network Resilience – ETH Zürich
Built techno-economic model of CO₂ transport resilience, showing resilience is cost-effective only under high utilization and prolonged failures, with temporary storage as the optimal strategy.

Mega Heat Pump Economic Evaluation – ETH Zürich & Everllence
Developed techno-economic model integrating thermodynamics and electricity markets, demonstrating revenue potential from FCR participation under varying market conditions.

Household Energy Optimization – ETH Zürich
Built MILP model and local app, enabling optimal appliance selection under dynamic pricing and CO₂ constraints.

Skills

Programming: Python, MATLAB
Modeling: ANSYS, SolidWorks
Core: Energy Systems, Thermodynamics, Optimization
Languages: Greek (Native), English (Fluent)

Awards

ETEK, AHK, Elysse Irrigation LTD (2024) — Top Mechanical Engineering Graduate (9.06/10)
MUSKITA Awards (2022, 2023) — Highest academic performance (2nd & 3rd year)
